What is Tampa Bay Next?
Tampa Bay Next is a program to modernize Tampa Bay’s transportation infrastructure and prepare for the future.

The Program Includes:
- Interstate Modernization
- Transit
- Bike/Pedestrian Facilities
- Complete Streets
- Transportation Innovation
- Freight Mobility

Tampa Bay Next Priorities:
- Move people and goods safely and efficiently
- Build a comprehensive regional transportation system
- Create meaningful opportunities for public input
- Balance regional needs with community concerns
- Commit to sustainable infrastructure decisions

FDOT wants to provide the community a more open and transparent view into the transportation planning process.

FDOT’s goals for the Community Working Groups are to:
♦ Engage Tampa Bay in a collaborative, productive conversation to develop a regional action plan for transportation.
♦ Ensure two-way dialogue with the community on FDOT’s current projects and provide a new mechanism for incorporating community feedback into the planning process.

We’re ready to roll up our sleeves and TURN IDEAS INTO ACTION.

FDOT received a clear message from interacting with residents, business leaders and elected officials about TBX.

Tampa Bay wants FDOT to approach interstate improvements as part of a broader vision for truly integrated, multimodal regional transportation solutions, and this region want transportation agencies and government organizations to work together.

Collaborative Labs, a Tampa Bay-based, third party, independent facilitator, will focus the Community Working Groups’ discussions on producing actionable results that balance regional level goals with community level concerns.

We’re inviting all our local and regional partners to these roundtable discussions.
