

I-4 Corridor

Section 8 FPID 456967-1

Program Description

Tampa Bay Next is a program to modernize Tampa Bay's transportation infrastructure and a process for engaging the public. Within the majority of the program area, the addition of express lanes is being considered to provide additional capacity, relieve congestion and provide a more reliable travel time option for passenger and transit vehicles. In addition, improvements address safety and traffic operations on the interstates. Interstate modernization projects incorporate additional elements such as opportunities to add bicycle and pedestrian facilities, aesthetic treatments, transit accommodations, and reconnecting streets where possible.

I-4 Corridor

The I-4 corridor is a major east-west connector that links the Tampa Bay region to the remainder of the state and nation. Enhancing safety and reducing congestion on I-4 are essential to Florida's economic, agricultural and technological growth.

Single Express Lane in Each Direction

FDOT has plans to widen I-4 approximately 17 miles from I-75 to the Hillsborough/Polk County line and add one buffer separated express lane in each direction along the I-4 corridor. The express lanes will provide additional capacity, relieve congestion and provide a more reliable travel time option for passenger and transit vehicles.

The planned roadway improvements will occur within existing right of way, however additional right of way may be required for the expansion of one or more existing stormwater management ponds.

IN PROJECT DESIGN

CONSTRUCTION SCHEDULE Letting: FY 2028 (Modified Phased Design Build)

CONSTRUCTION COST \$495,450,000 (FY28 \$)

PD&E STUDY APPROVED October 5, 2019

Buffer Separated Express Lanes (from I-75 to Hillsborough/Polk County Line)
